

MAINTENANCE TIPS

Please keep this page for tips and tricks on how to maintain your treatment.

- **Shampoo Less**

Washing hair is a surefire way to shorten the lifespan of a smoothing treatment. Shampoo about one to two times a week at most, depending on their hair type.

- **Shampoo and Condition Wisely**

Use of shampoo and conditioner that is color-safe and free of parabens, sulfates, gluten, and phthalates will help prolong the treatment.

Ask your stylist which products would work best to help maintain your treatment.

- **Condition Before Styling**

Apply a leave-in conditioner to maintain the treatment's silky effects, whether you're air-drying or using hot tools to style your hair.

- **Protect Your Tresses**

Protecting hair from heat and environmental stressors is a must !
